Subject: enhanced mitigation measures for Monument
EPA Comments Monument Buttes Mitigation 07172015.docx

Hi Molly,
Here is our response to the enhanced mitigation measures for Monument Butte. We've reviewed them closely considering technical issues and regulatory authority issues, so as I've told you we've had to modify or reject some of them. The EIS still needs to have some final tweaks plugged in, so it will probably come next week. Let me know if you have any questions or concerns with anything in this document.
